Subject: Dissolved Gases

Steve and Holly,

I could not find a spreadsheet that goes with Shaw Set #6511 for the dissolved gases. But I was able to reconstruct everything from the raw data so I can complete the ADQ without it. But it should be included in the data set for completeness. All dissolved gases looked good except the CCC in the 6511 set misidentifies n-butane as butene, but the recovery is still acceptable (I recalculated the concentration from the area using the n-butane response factor).

Thanks

Dave
